SKILLS

Languages: JavaScript, Python, Java, C, C++, SQL
Web Technologies: HTML5, CSS3, React.js, Next.js (learning), Vite, Node.js, Express.js, REST APIs, Bootstrap, EJS, Tailwind CSS
Database & Cloud: MongoDB, MySQL, PostgreSQL, SQLite, Mongoose, Cloudinary, MongoDB Atlas
APIs & Integrations: Google Gemini AI, Adzuna API, PDF.js, Web Speech API, WebRTC, Google Maps API, JWT Authentication
Core CS Concepts: Data Structures & Algorithms, Design & Analysis of Algorithms (DAA - in progress), DBMS, OOPs, Operating Systems, Computer Networks
Tools & Platforms: Git, GitHub, GitHub Pages, Postman, VS Code, Vercel, Render, Arduino IDE

PROJECTS

HireAI — AI-Powered Job & Career Platform <i>React, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Gemini AI, Adzuna API, PDF.js</i> Live: hireai-blond.vercel.app GitHub: github.com/gopalnayak980/hireai - Engineered a full-stack job platform integrating Adzuna API for real-time job search and MongoDB for persistent user/saved-job data. - Implemented JWT authentication with protected user functionality and a personalized dashboard. - Developed a Gemini-powered AI Resume Matcher providing match scores, strengths, missing skills, and recommendations. - Added PDF resume upload with PDF.js text extraction, feeding extracted content directly into the AI matching workflow. - Created an AI Interview Preparation module for role-specific questions and guidance; deployed frontend on Vercel and backend on Render.	2026
JARVIS — Personal AI Voice Assistant <i>Python, Flask, SQLite, Google Gemini AI, JavaScript, Web Speech API, WebRTC, Render</i> Live: jarvis-ai-8zh0.onrender.com GitHub: github.com/gopalnayak980/jarvis-ai - Designed a full-stack bilingual (Hindi & English) AI assistant using the Google Gemini API, with persistent memory via SQLite across server restarts. - Integrated Gemini Vision API for real-time image analysis, plus motion detection using JavaScript Canvas API and WebRTC camera access. - Styled a custom animated HUD-style frontend with CSS animations and live system stats; included Web Speech API for voice recognition and TTS output. - Deployed on Render with environment-variable-based API key security across 2000+ lines of Python backend and JavaScript frontend code.	2026
Building Material Supplier — Business Website <i>HTML5, CSS3, JavaScript, Git, GitHub Pages</i> Live: jaimatadibuildingmaterial.com GitHub: github.com/gopalnayak980/jai-mata-di-website - Created a responsive business website using HTML5, CSS3, and vanilla JavaScript, featuring a product showcase, gallery, material calculator, and quotation flow. - Set up WhatsApp enquiry, Google Maps, click-to-call, responsive navigation, and interactive UI animations to improve customer experience. - Used Git/GitHub for version control and deployed the website on GitHub Pages with a custom domain.	2026
WanderList — Full Stack Travel Listing Platform <i>Node.js, Express, MongoDB, EJS, Cloudinary, Groq AI</i> Live: wanderlist-1-msxf.onrender.com GitHub: github.com/gopalnayak980/wanderlist - Launched an Airbnb-inspired platform with role-based authentication, CRUD operations, backend REST APIs, review system, and booking management. - Integrated Groq AI for chatbot, intelligent price suggestions, and review summarization; deployed on Render with MongoDB Atlas.	2025

TRAINING

CipherSchools (EdTech Company) <i>MERN Stack Summer Training (CSE443)</i> - Completed an academic MERN stack training program, building backend REST APIs and a full-stack fleet management application, with a report submitted via LPU's UMS portal. - Delivered two graded full-stack projects — a To-Do App and a Library Management App — with JWT-based authentication and database schema design. - Collaborated on FleetOps, a team-developed role-based fleet management MERN application, contributing to backend API design and code reviews.	Jun 2026 - Jul 2026
--	---------------------

CERTIFICATES

CipherSchools — Full-Stack Development (Aug 2026) CipherSchools — Low Level System Design (Aug 2026) CipherSchools — Generative AI Essentials (Aug 2026) CipherSchools — Git and GitHub (Jul 2026) Infosys Springboard — DBMS Part 1 (Aug 2026) Infosys Springboard — Programming Using C++ (Aug 2025) LPU & iamneo (NIIT) — Programming in Java (2026) LPU & iamneo — Computer Programming, 72 Hrs (2025) WNS Cares/CyberSmart — CSR Awareness Project (2025) LPU & iamneo — Object Oriented Programming (2026)
