SKILLS

Languages: JavaScript, Python, Java, C, C++, SQL
Web Technologies: HTML5, CSS3, React.js, Next.js (learning), Vite, Node.js, Express.js, Flask, FastAPI, Celery, REST APIs, Bootstrap, EJS, Tailwind CSS
Database & Cloud: MongoDB, MongoDB Atlas, MySQL, PostgreSQL, SQLite, Mongoose, Redis, Firebase Firestore, Cloudinary, AWS (Cloud Practitioner)
APIs & Integrations: Google Gemini AI, Groq LLM, Adzuna API, PDF.js, Google Maps API, JWT Authentication
Core CS Concepts: Data Structures & Algorithms, Design & Analysis of Algorithms (in progress), DBMS, OOPs, Operating Systems, Computer Networks
Tools & Platforms: Git, GitHub, GitHub Pages, Postman, VS Code, Vercel, Render, Netlify

PROJECTS

DevAgent — AI Software Engineering Agent Orchestration Platform **2026**
React, FastAPI, Python, Groq LLM, PostgreSQL, Redis, Celery, JWT, Vercel, Render
Live Demo | GitHub

- Architected an AI software-engineering agent platform that classifies user tasks and routes them to specialized Coding, Debugging, and Study Agents.
- Integrated persistent conversation memory, conversation history, tool calling, Human-in-the-Loop approvals, and asynchronous background jobs using Celery and Redis.
- Secured the platform with JWT authentication, password hashing, user-level data isolation, request validation, rate limiting, security headers, and execution tracing/observability.
- Deployed the full-stack application on Vercel, Render, Neon PostgreSQL, and Upstash Redis, with 166 automated backend tests passing.

HireAI — AI-Powered Job & Career Platform **2026**
React, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Gemini AI, Adzuna API, PDF.js
Live Demo | GitHub

- Engineered a full-stack job platform integrating Adzuna API for real-time job search and MongoDB for persistent user/saved-job data.
- Implemented JWT authentication with protected routes and a personalized dashboard for each user.
- Developed a Gemini-powered AI Resume Matcher providing match scores, strengths, missing skills, and recommendations.
- Added PDF resume upload with PDF.js text extraction, feeding extracted content directly into the AI matching workflow.
- Created an AI Interview Preparation module for role-specific questions and guidance; deployed frontend on Vercel and backend on Render as separate services over REST APIs.

Building Material Supplier — Business Website & Accounting App **2026**
HTML5, CSS3, JavaScript, Firebase Firestore, Git, GitHub Pages, Netlify
Live Demo | GitHub

- Launched a responsive website for a real building materials business using HTML5, CSS3, and vanilla JavaScript, featuring a product showcase, gallery, multi-step material calculator, and quotation flow.
- Set up WhatsApp enquiry, Google Maps, click-to-call, responsive navigation, and interactive UI animations to improve customer experience.
- Built a Firebase Firestore accounting app for the business, deployed on Netlify; hosted the website on GitHub Pages with a custom domain.
- Configured Google Search Console and Google Business Profile for online visibility; used Git/GitHub for version control.

TRAINING

CipherSchools (EdTech Company) **Jun 2026 - Jul 2026**
MERN Stack Summer Training (CSE443)

- Completed an academic MERN stack training program, building backend REST APIs and a full-stack fleet management application, with a report submitted via LPU's UMS portal.
- Delivered two graded full-stack projects — a To-Do App and a Library Management App — with JWT-based authentication and database schema design.
- Collaborated on FleetOps, a team-developed role-based fleet management MERN application, contributing to backend API design and code reviews.

CERTIFICATES

AWS Training & Certification: AWS Cloud Practitioner Essentials (Sep 2026)
CipherSchools: Full-Stack Development (Aug 2026), Low Level System Design (Aug 2026), Generative AI Essentials (Aug 2026), Git and GitHub (Jul 2026)
Infosys Springboard: DBMS Part 1 (Aug 2026), Programming Using C++ (Aug 2025)
NPTEL (IIT Madras / IIIT Hyderabad): Privacy and Security in Online Social Media (Jul-Oct 2026, Elite)
LPU & iamneo (NIIT): Programming in Java (2026), Computer Programming, 72 Hrs (2025), Object Oriented Programming (2026)
WNS Cares/CyberSmart: CSR Awareness Project (2025)

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology in Computer Science and Engineering; CGPA: 7.8 Aug 2024 - Present
